

# MindMaps for Visio

## Licensing

### Testing the product

After the first start the Standard Edition of the application can be used **free of charge for 30 days** without a license key.

For further usage MindMaps for Visio requires a valid license key to operate. If no license key is provided all functionality will be disabled and a message will inform the user of the missing license key at the startup of Visio.

### Editions

You can choose between the Standard Edition of MindMaps for Visio and the Professional Edition. The Professional Edition **includes all features** of the Standard Edition and in addition tools to create and document Microsoft SharePoint website structures as intuitive mind maps.

### Licenses

We offer two different types of licenses. The Personal License is valid for one machine only while the Company License is valid for a whole domain of machines.

### Obtaining license keys

License keys can be obtained from oneAssist. Please use the form on our website to request a quotation based on our current pricing.

When ordering a license key from oneAssist please provide your domain name and your machine name, if you are purchasing a Personal License. The licensing window accessible from the MindMaps for Visio ribbon tab will inform you about the status of your license key and provide you with your domain and machine names.
